7. Send encrypted withdrawal request with Nonce signature
7. Send encrypted withdrawal request with Nonce signature
7. Send encrypted withdrawal request with Nonce signature
2. Initiate commercial authorized settlement R
1. Register protocol parent_hashes and similarity similarities
Distributed Clearing & Settlement Ledger
Revenue Allocation Smart Contract
5. Allocate proportional revenue tier 3
4. Allocate proportional revenue tier 2
3. Allocate proportional revenue tier 1
pending withdrawal balance mapping balances
8. Transfer tokens
6. Status judgment:
20 years elapsed / root meta-protocol
External Receiving Endpoints
Creator External Wallet Account
Ecological Backfeed Pool 0x0000...FADE

图1

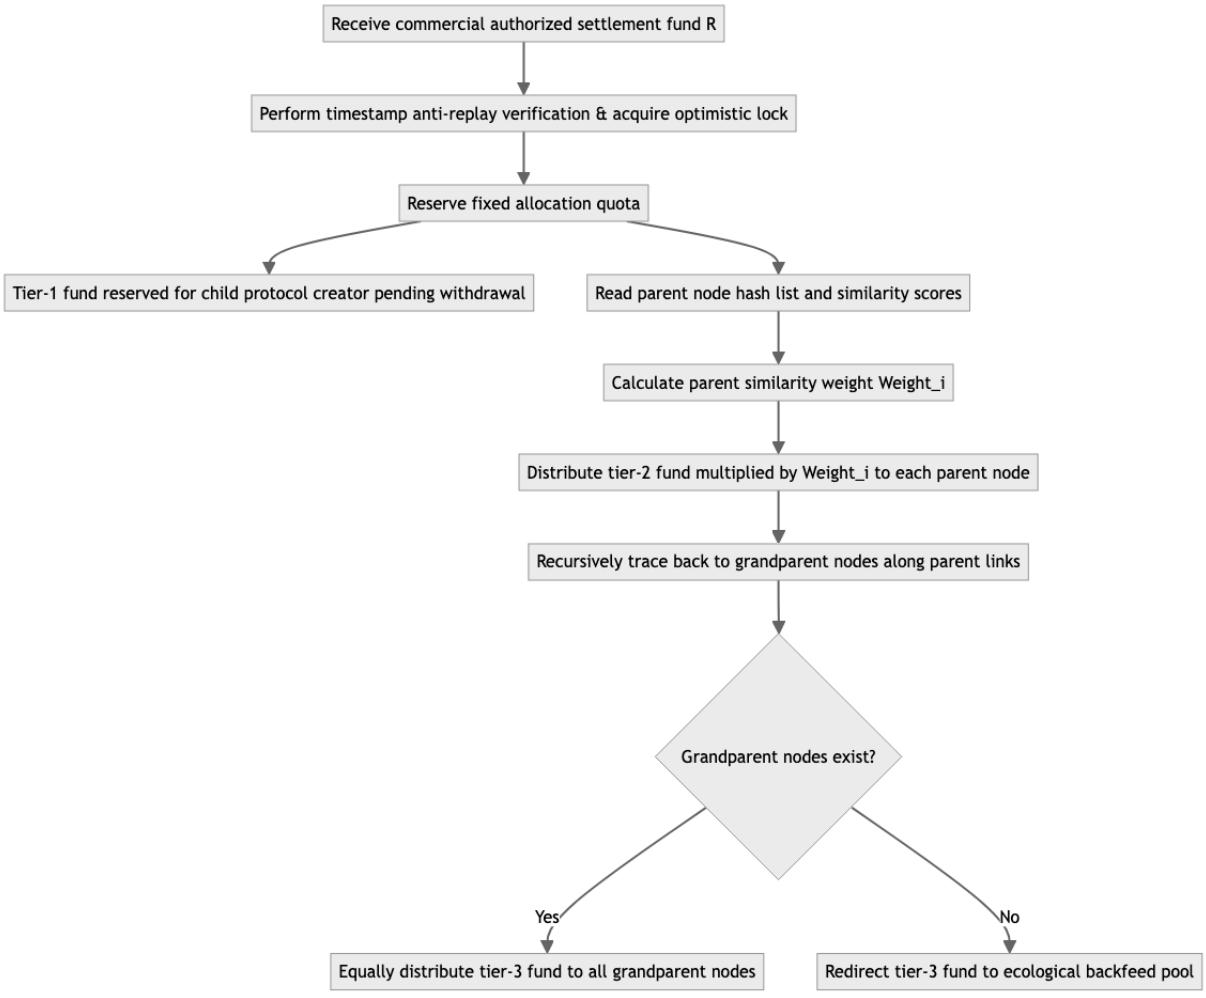

Receive commercial authorized settlement fund R
Perform timestamp anti-replay verification & acquire optimistic lock
Reserve fixed allocation quota
Tier-1 fund reserved for child protocol creator pending withdrawal
Read parent node hash list and similarity scores
Calculate parent similarity weight Weight_i
Distribute tier-2 fund multiplied by Weight_i to each parent node
Recursively trace back to grandparent nodes along parent links
Grandparent nodes exist?
Yes
No
Equally distribute tier-3 fund to all grandparent nodes
Redirect tier-3 fund to ecological backfeed pool

图2

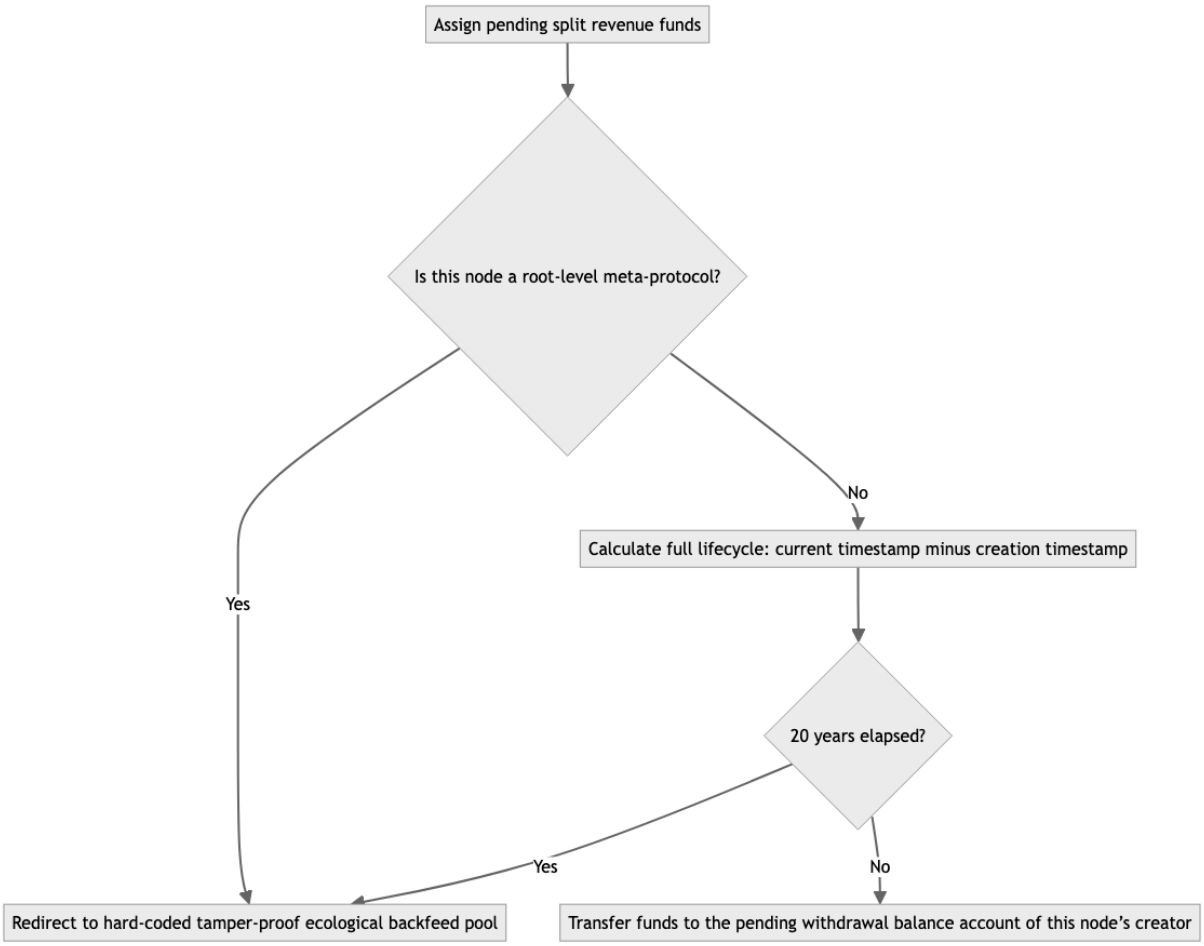

Assign pending split revenue funds
Is this node a root-level meta-protocol?
Yes
No
Calculate full lifecycle: current timestamp minus creation timestamp
20 years elapsed?
Yes
No
Redirect to hard-coded tamper-proof ecological backfeed pool
Transfer funds to the pending withdrawal balance account of this node's creator

图3
